

“WOOD VALLEY”

For wooden pallet manufactures

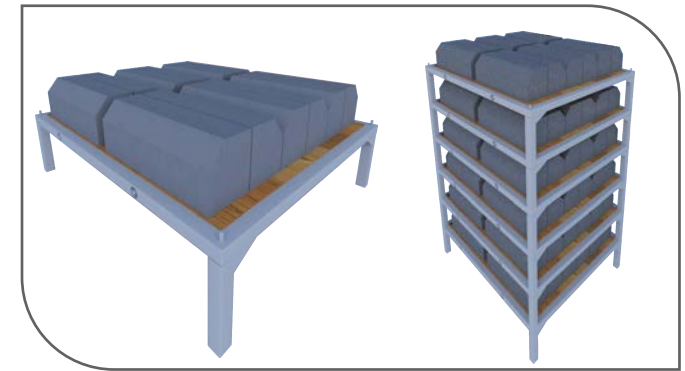

Why Wood Valley?

Wooden pallets is made from the best types of pine wood specially for cement block machines . It is processed by drying before production and treated with a dedicated oil to isolate wooden panels from the impact of natural elements .panels are assembled by waterproof glue and supported by locking screws fastening by passing through drilled hole in it for easy install and assemble it . it is supported by steel sheets to strenghten it with each other .the pallet is designed to suit hot and cold climate , and meet quality standards as requested by the customer .

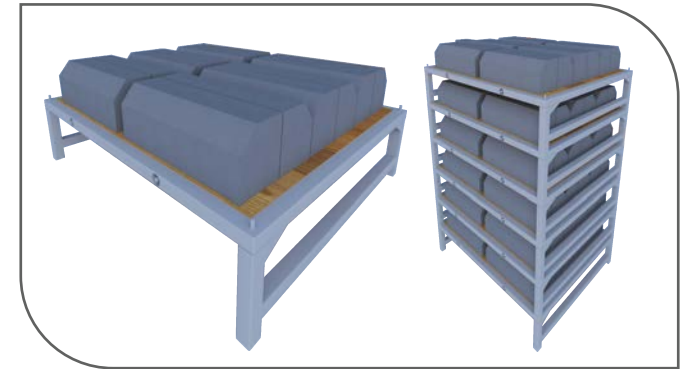

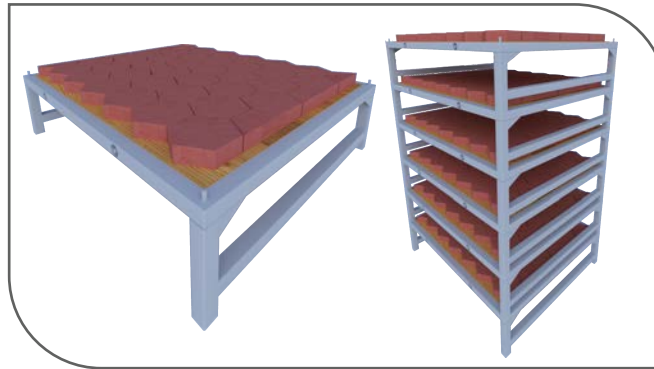

Model (1)
